

Filterclean utilizes new technology to extend pump life and lower energy costs

We are proud to announce the arrival of DAB's active driver, a new device that prolongs the life and lowers running costs of a water pump.

The Active Driver device is an innovative **variable speed electric pump integrated control system**. This makes this type of pump control ideally suited to farms, dairy farms, hotels, pubs and any other application where the flow rates vary constantly, but a stable water pressure is required. The pressure output can be adjusted along with the various settings, thanks to a simple user interface.

The active driver comprises of, an inverter, a pressure sensor, a flow sensor and innovative electronics.

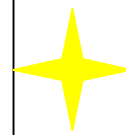

Advantages of the active driver

- Enhanced comfort with constant pressure output
- Energy saving; only pumping what is required
- Silent running
- Compact
- Auto cooling
- Overpressures eliminated
- Extended pump lifetime
- Compatibility
- Easy installation
- Dry running, overload, overheating and abnormal voltage protection all built in

For more information on the active driver or any of our products please call us

summer*

Friendly cleaning bacteria

Filterclean have used Fragile Earth products over a number of years and have found them to be very cost effective and above all **environmentally friendly with no hazardous chemicals**.

With the success Fragile earth cleaning products, we are pleased to announce an extension to the range.

A smaller bottle size containing the same concentrated cleaning power is now available for the domestic market.

So if you are looking for an environmentally friendly way of domestic cleaning please see the reverse of this newsletter. Prices subject to VAT

...Change Filterclean competition...

Filterclean is changing! To keep up with the modernisation of the company, reflect the range of products we now offer and ensure a leading position in the marketplace, filterclean is looking for a new identity, name and image.

To be in with a chance of winning a very nice bottle of bubbly, simply e mail your ideas for a new company name and logo or simply a logo design only for FW Technologies Ltd to Liz at info@filterclean.co.uk
